WORK EXPERIENCE

Software Developer

June 2024 - Present

Syntags Professional Services

- Developed and maintained **scalable full-stack applications** using Angular, React.js, Next.js, TypeScript, Node.js, and Express.js, with reusable and modular application architecture.
- Improved **Next.js performance by 40–50%** through SSR, code splitting, and image optimization, while enhancing SEO and achieving **90+ Lighthouse scores**; optimized Angular applications using lazy loading and OnPush, reducing bundle size by **35%**.
- Designed and integrated **RESTful and GraphQL APIs** and worked with **Microservice Architecture, RPC-based communication, and RabbitMQ** for distributed and asynchronous service communication.
- Worked with **Docker, CI/CD, and development automation lifecycle**, supporting development, build, testing, staging, production deployment, and application troubleshooting.
- Led a team of 4 developers**, establishing reusable development practices and Agile workflows that reduced delivery time by approximately 30%, while collaborating across frontend and backend teams.

Frontend Developer

Aug 2023 - May 2024

Unipolar Technologies Pvt Ltd

- Developed and maintained scalable web applications using **React.js** and **Next.js**, improving application performance through reusable components and optimized rendering techniques.
- Integrated and consumed RESTful APIs, enabling real-time data synchronization and efficient communication between frontend and backend systems for a seamless user experience.
- Deployed and maintained production applications on **Vercel, Plesk, and FileZilla**, streamlining release processes and ensuring stable, optimized deployments with minimal operational overhead.

LIVE PROJECTS

Invocreto

- Led the frontend development of InvoCreto, a business management and invoicing platform, using Next.js and Angular, focusing on scalable architecture and reusable UI components.
- Worked with Node.js, Express.js, MongoDB, Microservice Architecture, RPC, RabbitMQ, and Docker as part of the application's backend and distributed service ecosystem.

Tech Stack: Next.js, Angular, Node.js, Express.js, MongoDB, PostgreSQL, RabbitMQ, Microservices, Docker

Indiacorporates

- Led the end-to-end development of IndiaCorporates, translating business requirements into application workflows and technical solutions across frontend, backend, and API integrations.
- Designed and developed user-centric interfaces, interactive dashboards, and end-to-end application workflows based on business requirements, covering frontend architecture, backend development, API integration, database integration, and deployment.

SKILLS

Frontend :	Angular, React.JS, Next.JS, Tailwind, Framer Motion
Backend :	Next.JS, Node.JS (Express)
Databases :	MongoDB, PostgreSQL
Others :	GraphQL, Git, Docker, Figma, Firebase

EDUCATION

Masters in Computer Application | Mumbai University

Aug 2021 - July 2023

- CGPA: 8.11

Batchlars in Commerce | Mumbai University

Aug 2018 - Mar 2021

- CGPA: 6.60
